

EBPP Potential Workshop

for sender and receiver of invoices

Subject

Leaders and process responsible from different departments have a mutual understanding of the opportunities for optimisation offered by the electronic handling of bills and payments.

They understand which processes can be optimised and the benefits it creates for them and their company.

The follow-up project steps are defined and the project proposal is prepared in readiness for a decision.

Contents

The participants are provided with a general overview of the most commonly found market models, solutions and services, the legal situation and the possibilities for electronic linkage.

The functions and new possibilities offered by EBPP are shown and discussed. Areas with the most potential for optimisation are identified and scenarios for introducing electronic invoice processing and handling of payments are defined.
